SUMMARY

AI Engineer with hands-on experience in Generative AI, LLMs, NLP, RAG, AI Agents, and Machine Learning. Proficient in Python, OpenAI APIs, LangChain, TensorFlow/PyTorch, Prompt Engineering, REST APIs, and AI automation, with a focus on building and deploying scalable AI solutions.

WORK EXPERIENCE

AI Engineer

[Metavystic Private Limited](#)

Jun '26 — Present
Islamabad, Pakistan

- Designed and implemented AI-driven automation solutions to streamline company workflows, reduce manual processes, and improve operational efficiency using Python, LLMs, AI Agents, APIs, and workflow automation.
- Developed and integrated self-hosted LLMs, RAG pipelines, and intelligent automation systems into real-world business applications, leveraging Ollama, LangChain, Open-Source Models, REST APIs, and Docker.

AI Consultant

[Pixis Software](#)

Aug '25 — Nov '25
Remote, United States

- Advised and implemented AI-driven solutions by analyzing business requirements, identifying automation opportunities, and designing scalable AI/ML, Generative AI, and LLM-based solutions. Collaborated with stakeholders and development teams to integrate AI capabilities, optimize workflows, evaluate model performance, and deliver reliable, business-focused AI solutions within Agile environments.

Customer Support Executive Operations

[IBEX Pakistan](#)

Dec '24 — Jun '25
Karachi, Pakistan

- Provided end-to-end customer support through effective verbal and written communication, resolving customer queries, handling escalations, troubleshooting issues, and maintaining accurate records. Consistently focused on customer satisfaction, first-contact resolution, active listening, conflict resolution, and service quality.

Data Analyst

[Voguetech](#)

Dec '23 — Dec '24
Hyderabad, Pakistan

- Analyzed and transformed business data to uncover trends, identify performance gaps, and generate actionable insights. Built SQL queries, dashboards, and KPI reports, validated data accuracy, and delivered data-driven recommendations to improve operational efficiency and business decision-making.

EDUCATION

Bachelor of Engineering in Information and Technology, Mehran University of Engineering and Technology (CGPA: 3.2/4.00) Oct '19 — Dec '23
Jamshoro, Pakistan

- Data Structures & Algorithms, Object-Oriented Programming, Computer Networks, Data Communication, Digital Communication, Wireless Communication, Mobile Communication, Operating Systems, Database Management Systems, Software Engineering, Network Security, Computer Architecture

CERTIFICATIONS

[Oracle Cloud Infrastructure 2025 Certified Generative AI Professional](#), Oracle

[Oracle Data Platform 2025 Certified Foundations Associate](#), Oracle

[Oracle Cloud Infrastructure 2025 Certified AI Foundations Associate](#), Oracle

[Generative AI developer \(TOP PERFORMER\)](#), ICode Guru

AWARDS & ACHIEVEMENTS

FYP | [Lightweight drone](#)

My Final Year Project focused on developing a lightweight drone, and the project was fully funded by NIGRI.

Ehsaas Undergraduate Scholarship (HEC) | [Awarded Scholar](#)

Fully Funded Scholarship | Merit & Financial Need-Based

PROJECTS

HRMS | [AI Automation](#) [Link](#)

Jun '26 — Present

- Working on AI-driven HR automation to transform core HR operations across recruitment, onboarding, attendance, leave, payroll, performance, and employee management. Building self-hosted Generative AI and RAG solutions using Ollama to automate workflows, document generation, approvals, and employee support while reducing repetitive work, improving operational efficiency, and enabling secure, scalable AI adoption.

Lightweight_Drone | FYP

Nov '22 — Nov '23

- Developed a lightweight, cost-effective drone to address challenges in aerial monitoring, including limited flight endurance, unreliable video transmission, and lack of real-time 3D mapping. Integrated a high-resolution camera, real-time video transmission, onboard backup recording, and LiDAR-based 3D mapping to enable reliable aerial surveillance, terrain mapping, infrastructure inspection, environmental monitoring, agriculture, and land surveying.

SKILLS & INTERESTS

Programming Languages Python, C++, SQL, Javascript

AI/ML Generative AI, LLMs, Machine Learning, NLP, RAG, AI Agents, Prompt Engineering

Data & Databases PostgreSQL, Vector Databases, SQL

DevOps & Deployment Docker, Git, Linux, CI/CD

AI Frameworks & tools LangChain, Ollama, OpenAI API, Hugging face, NumPy, Panda, Matplotlib, Scikit-Learn, TensorFlow

Automation AI Workflow Automation, Business Process Automation, LLM Integration

Backend & APIs Django, FastAPI, REST APIs, API Integration
