SUMMARY

AI Engineer specializing in self-hosted LLMs and RAG pipelines for business automation. Built and deployed production AI agent systems (LangChain, Ollama, Docker) that cut manual workflow steps for HR and operations teams. Oracle-certified in Generative AI and Cloud AI Foundations.

WORK EXPERIENCE

AI Software Engineer Sep '26 — Present
Pixis Software United States (Remote)
- Managed 2 client accounts, designing and deploying AI-powered software solutions that reduced manual processing by ~40% and improved workflow turnaround time by ~60%.
- Automated 20+ hours/week of repetitive workflows using AI, APIs, backend services, and integrations, reducing processing time from several hours to under 30 minutes.

AI Engineer Jun '26 — Sep '26
Metavystic Private Limited Islamabad, Pakistan
- Built self-hosted RAG pipelines (Ollama + LangChain) automating document generation and approvals for HR/ops workflows, replacing ~180 hours/week of manual work across a 4-person HR team
- Deployed AI agents via Docker + REST APIs integrated into existing business systems, reducing manual request and approvals task turnaround from days to hours
- Owned the model-to-production pipeline end-to-end: prompt design, self-hosted model selection, API integration, and deployment

AI Consultant Aug '25 — Nov '25
Pixis Software United States (Remote)
- Scoped and delivered 4 GenAI/LLM solutions for clients by translating business requirements into technical specs, working directly with stakeholders and dev teams
- Evaluated and iterated on RAG retrieval pipelines to improve response accuracy and output quality across client deployments

Customer Support Executive Operations Dec '24 — Jun '25
IBEX Pakistan Karachi, Pakistan
- Resolved high-volume customer queries and escalations; maintained first-contact resolution focus

Data Analyst Dec '23 — Dec '24
Voguetech Hyderabad, Pakistan
- Built and maintained 5+ SQL-driven dashboards tracking sales and revenue KPIs over a 1-year period, giving leadership real-time visibility into performance across product lines
- Analyzed sales trends across 12 months of data, identifying underperforming segments and delivering recommendations that directly informed pricing and inventory decisions

EDUCATION

Bachelor of Engineering in Information and Technology , Mehran University of Engineering and Technology Oct '19 — Dec '23
Jamshoro, Pakistan
- Data Structures & Algorithms, Object-Oriented Programming, Computer Networks, Data Communication, Digital Communication, Wireless Communication, Mobile Communication, Operating Systems, Database Management Systems, Software Engineering, Network Security, Computer Architecture

PROJECTS

Ajanta AI Link Oct '26 — Oct '26
- Developed and deployed a user-friendly AI conversational agent using LLMs and prompt engineering to provide personalized insights into my education and career while supporting general-purpose, open-ended queries.

HRMS | AI Automation Link Jun '26 — Sep '26
- Building self-hosted GenAI + RAG automation for HR operations (recruitment, onboarding, attendance, payroll, approvals) using Ollama and LangChain designing document generation and approval workflows to eliminate repetitive manual HR tasks while keeping data fully on-premise for security and compliance

Lightweight_Drone | FYP Link Nov '22 — Nov '23
- Developed a lightweight, cost-effective autonomous drone with 2+ hour flight endurance, real-time video transmission, backup recording, and LiDAR-based 3D mapping. Designed for aerial surveillance, infrastructure inspection, environmental monitoring, agriculture, and land surveying.

AWARDS & ACHIEVEMENTS

FYP | Lightweight drone-Fully funded by NGIRI

Ehsaas Undergraduate Scholarship (HEC) | Awarded a fully funded, merit- and need-based scholarship.

SKILLS & INTERESTS

Programming Languages Python, C++, SQL, JavaScript
AI/ML Generative AI, LLMs, Machine Learning, NLP, RAG, AI Agents, Prompt Engineering
Data & Databases PostgreSQL, Vector Databases, SQL
DevOps & Deployment Docker, Git, Linux, CI/CD, AWS
AI Frameworks & tools LangChain, Ollama, OpenAI API, NumPy, Matplotlib, Scikit-Learn, TensorFlow, Hugging Face, Pandas, YOLO, PyTorch, OpenCV, Computer Vision
Automation AI Workflow Automation, Business Process Automation, LLM Integration
Backend & API Development FastAPI, RESTAPI, Microservices, API Integration

CERTIFICATIONS

Oracle Cloud Infrastructure 2025 Certified Generative AI Professional, Oracle
Oracle Data Platform 2025 Certified Foundations Associate, Oracle
Oracle Cloud Infrastructure 2025 Certified AI Foundations Associate, Oracle
Generative AI developer (TOP PERFORMER), ICode Guru
